This years' subject has generated much interest, and enthusiasm before we even begin. Some of you have already started to research our winged and feathered wildlife. If you are so inspired and would like to work in your favorite medium, start collecting images of birds and butterflies and bring to first class along with your art supplies. Whether you select paper or canvas, miniatures or realism, abstract or collage, sketching or impressionism, than this is the class for you. Set yourself free, I'll get you started, and let's "fly" into the realm of these heavenly creatures of beauty that have, up until now, escaped our pencils and paintbrushes.
